

Dr. Ilias Kotsireas presents

# DO BILLIONAIRES COMPUTE EIGENVALUES?

## 20 YEARS OF GOOGLE'S PAGERANK SAGA

The keynote will feature professor of Computer Science, Ilias Kotsireas, from Wilfrid Laurier University. Dr. Kotsireas has published over 100 journal and conferences papers. His research has been funded by NSERC for 15 years, and currently serves as the Chair of ACM SIGSAM and is the director of the CARGO Lab.

**Tuesday**  
**March 8, 2016**  
**5 PM | BA209**  
**FREE EVENT**

A significant part of Google's early success in the realm of search engines is attributed to the PageRank algorithm, invented 20 years ago.

Join us as we delve into the concepts behind the PageRank algorithm that are necessary to gain a thorough understanding of its inner workings, including how to build the corresponding Google matrix.
